The economy metal A frames are a popular choice for businesses looking to advertise and event planners looking to improve on-site logistics. With metal A frames, the message will be bold, noticeable, and highly visible. When not in use, metal A frames fold flat for easy storage. The economy metal A frames have a powder coated black finish that looks clean and professional. The metal A frames have a handle on top for easy transport and portability when they are collapsed. The latch on the A frame keeps it secure while on display. With the double-sided frame, you can display 2 different posters in the same A frame. 3mm corrugated plastic sheets or rigid PVC sheets are recommended for outdoor usage. Posters slide in from the top. Simply slide down the posters into the channels and onto the channel of the A frame at the bottom.
