A-frames, aka sandwich board signs, are an obvious solution for businesses, and they are also great for shops that already have a prominent position but just want to increase their signage impact and promote specials or new products. Adding and removing the posters is a breeze with these A-frame style poster stands. Aluminum snap frames also provide a very professional feel. You can keep a range of posters on hand and change them quickly and regularly to suit different sales periods or to ensure your footpath signage is always fresh and interesting. Recommended for indoor use only. Only accepts paper or vinyl posters. Not designed for coroplast or sintra.
