This X-banner stand is our least expensive banner stand option. This X-banner stand is extremely lightweight and simple with a reputation for being the best inexpensive banner stand. 4 fiberglass poles reach from the center hub to the 4 corners of the banner and hook through grommets to hold the banner under tension. The tips on the bottom two poles sit on the ground, and a rear folding leg balances the banner like a tripod. Designed for a banner with grommets in each corner. It comes with a nylon carrying bag. Product launches in showrooms or retail store displays are among the popular uses for X-banner stands. Recommended for indoor use only.
